Never a Failure

The Red River Valley of Minnesota and North Dakota has never had a failure of crops. It produced 30,000,000 bushels of wheat besides other cereals in 1890. Farms can be had on the crop plan, or long time cash payments. It is not an uncommon thing to pay for a farm from the proceeds of one crop. It has all of the advantages of an old country in the shape of school, church, market, postal and railway facilities, and all the chances of a new country in the way of cheap lands, rich soil and increase in values. It is one of the most fertile and promising regions in America not yet fully occupied. In the rush to the far west, however, this rich valley has been overlooked. It has room for a million more people. Write to

F. I. WHITNEY, St. Paul, Minn., for particulars. Publications sent free.
